About Me

Hello! I'm Azzam Syakir, a seasoned Backend Developer with 5 years of programming expertise. I have experience with various software architecture implementations, including Clean Architecture, Micro-services, MVVM, and MVC patterns. With 2 years in Golang and 1 year in Laravel, I excel in creating clean, scalable systems. Check out my diverse projects on GitHub: [AzzamSyakir](#). Let's innovate together!

Education

(2019-2022) | Quadrant Boarding school | IT School

I studied at Quadrant Boarding School, an IT-focused school, from 2019 to 2022, where I learned programming and focused on backend development.

(2022-present) | HomeSchool HighSchool

I am continuing my high school education at HomeSchool HighSchool from 2022 to the present.

Working Experience

February 2024 - Present | golang backend freelance • Freelancer.com

As a freelance Golang Backend Developer, I leverage Golang to create innovative and impactful solutions. My programming expertise and experience in backend development ensure high-quality, efficient, and scalable results tailored to each client's needs.

January 2024 - Present | golang backend freelance • Upwork

As a freelance Golang Backend Developer, I leverage Golang to create innovative and impactful solutions. My programming expertise and experience in backend development ensure high-quality, efficient, and scalable results tailored to each client's needs.
